Our Live-Edge Slabs are sold by the Board Foot. Many pieces have been scaled and may have a number written on the face followed by "BF." We calculate the "Board-Foot" measure (BF or Bd. Ft.), using the following formula and the slab's rough dimensions:

Thickness (in inches) X Average Width (in inches) X Length (in feet)

12

Example: 1.25"(5/4) X 12" X 8' divided by 12 = 10 Bd. Ft.

Example: 2"(8/4) X 12" X 8' divided by 12 = 16 Bd. Ft.

Multiply the number of BF in the piece by the price per BF to calculate the total price of the slab.

Unless otherwise noted, all of our slabs have been kiln dried for stability.
